Twin Buttes Fairgrounds Arena Complex Project

Twin Buttes, ND

\$5M+ Indoor & Outdoor Arena Construction

12-Month Build · Full Building Erection · Custom Chute Systems

Project Overview

A \$5M+ fairgrounds arena complex construction project completed over 12 months — delivering a complete indoor arena with full building erection, roofing, siding, interior/exterior chute systems, wood stalls, and custom crow's nest, plus a fully-equipped outdoor arena with complete chute and pen systems, custom crow's nest, and white tracking installation around the entire track.

Scope

Dual Arenas

Indoor + outdoor arena
complex

Architectural Features

This fairgrounds arena complex showcases comprehensive construction capabilities for both indoor and outdoor equestrian facilities — featuring a complete indoor arena with full building erection, custom interior/exterior chute systems, wood stalls in the lean-to, and a custom-built crow's nest, plus a fully-equipped outdoor arena with complete chute and pen systems, custom crow's nest, and professional white tracking installation.

Indoor Arena Scope

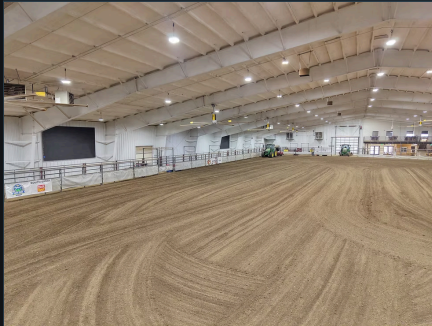

- **Full Building Erection** — Complete structural construction from ground up
- **Roofing, Siding & Gutters** — Complete exterior envelope installation
- **Interior & Exterior Chute Systems** — Custom-engineered livestock handling systems
- **Wood Stalls in Lean-To** — Professional stall construction and installation
- **All Doors, Windows & Garage Doors** — Complete door and window package installation
- **Custom Crow's Nest** — Interior observation platform built to spec

Outdoor Arena Scope

- **Complete Chute & Pen Systems** — Supplied and installed all livestock handling infrastructure
- **Custom-Built Crow's Nest** — Elevated observation platform for outdoor events
- **White Tracking System** — Professional track installation around entire perimeter
- **Ground-Up Construction** — Complete outdoor arena build from foundation to finish
- **Trade Coordination** — Seamless integration of all arena systems and components
- **Timeline Delivery** — On-schedule completion within 12-month window

Indoor Arena Construction

The indoor arena represents a complete building erection project — from structural steel framework to roofing, siding, and gutters, with custom interior and exterior chute systems, wood stalls in the lean-to, all doors and windows, and a custom-built crow's nest for elevated viewing during events.

Outdoor Arena Construction

The outdoor arena features a complete chute and pen system installation, custom-built crowd's nest for elevated viewing, and professional white tracking system installed around the entire track perimeter — creating a fully-equipped outdoor equestrian facility ready for rodeo events and competitions.

Project Highlights

Month Construction Timeline

This \$5M+ construction contract was completed over 12 months, delivering both a complete indoor arena with full building erection and a fully-equipped outdoor arena. The project required expert coordination across multiple trades, efficient material delivery, and a skilled crew managing both facilities simultaneously to meet every milestone for this comprehensive fairgrounds development.

Dual Arena Construction

Our team built both indoor and outdoor arena facilities from the ground up. The indoor arena included complete building erection with roofing, siding, gutters, all doors and windows, interior/exterior chute systems, wood stalls in the lean-to, and a custom crow's nest. The outdoor arena featured complete chute and pen systems, custom crow's nest, and professional white tracking around the entire track perimeter.

Professional Steel Construction, On-Time Delivery

This fairgrounds arena complex represents our commitment to quality construction and efficient project delivery — completing a \$5M+ contract over 12 months and delivering both indoor and outdoor arena facilities that serve as premier venues for rodeo events, equestrian competitions, and community gatherings.
